

Shield Security Services (Yorkshire) Ltd Carbon Reduction Plan

Commitment to achieving Net Zero

Shield Security Services (Yorkshire) Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2025	
Additional Details relating to the Baseline Emissions calculations.	
Shield Security Services (Yorkshire) Ltd have been aware of the need to reduce our carbon footprint for some time but have not been able to capture the information required to produce a carbon reduction plan until now.	
In terms of Scope 1 we measure the amount of fuel we use for security guards and engineers to complete their tasks on a day to day basis.	
Scope 2 we use the Gas and Electricity used in our offices.	
Scope 3 we measure the commuting of our employees to and from their place of work. We have introduced a bike to work scheme that we know will reduce this footprint.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	142.74794
Scope 2	22.8474
Scope 3 (Commuting)	88.8076

Shield Security Services (Yorkshire) Ltd Carbon Reduction Plan

Total Emissions	254.40294 tCO₂e
------------------------	-----------------------------------

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	TOTAL (tCO₂e)
Scope 1 Van and car Fuel Usage	142.74794
Scope 2 Gas and Electricity Usage	22.8474
Scope 3 (Commuting)	88.8076
Total Emissions	254.40294 tCO₂e

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We will replace our vans with electric vehicles as they become ready for replacement. We will promote the cycle to work scheme more robustly, we will promote car sharing for commutes and assume that employees will move more toward electric and hybrid vehicles for their commute. We project that carbon emissions will decrease over the next five years to **182.59825 tCO₂e** by 2031. This is a reduction of **28.22479%**

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

As 2025 is our first year of actively measuring our carbon footprint we do not have any reductions to report however, we have achieved ISO14001 accreditation during 2025 and have now put tracking in place for the reduction in fossil fuel usage in our company vehicles with the gradual electrification of the company fleet as well as promoting the cycle to work

scheme and encouraging employees to car share or take the bus whenever possible.

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

We will adopt LED lighting wherever possible and investigate the use of solar panels and heat pumps.

We will engage with suppliers to share energy efficiency and carbon reduction best practices.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of Shield Security Services (Yorkshire) Ltd:
